## WORK EXPERIENCE

---

### Software Developer

Nov'2019-present

*MaisEficaz, Lisbon*

Developing software within a team working with other teams, both national and international, and a large existing codebase and databases, analysing unfamiliar code of a reasonable complexity to understand and extend the functionality of existing modules, as well as developing new ones, to satisfy the ongoing requirements. Working with languages and tools such as Java, JSP, Javascript, Angular, Python, Oracle WebLogic, Oracle SQL, PL/SQL, Git, TFS, Maven, SOAP/REST APIs, Swagger, Adobe LiveCycle.

### Internship

Jan'2019-Sep'2019

*Celfocus, Lisbon*

Did my MSc thesis at Celfocus (Novabase/Vodafone Portugal joint venture) in the Telecom Revenue Management department. Worked with Big Data and Analytics tools such as Apache Kafka, Flink and Cassandra. Also developed skills in Java, Python, PL/SQL, Git, Maven and clean code practices.

### Internship

Nov'2016-Mar'2017

*Celfocus, Lisbon*

Worked in the eLearning lab, explored open source projects, researched state of the art solutions and developed a VR demo for Android showcasing a 3D model of the campus library.
