EXPERIENCE

- **MaisEficaz**

Lisbon, Portugal

Software Developer

Nov' 2019 - Present

- **Description:** Developing software in an Agile environment within a team working with other teams, both national and international, and a large existing codebase and databases, analysing unfamiliar code of a reasonable complexity to understand and extend the functionality of existing modules, as well as developing new ones, to satisfy the ongoing requirements.
- **Skills:** Working with languages and tools such as Java, JSP, C#, .NET, Windows Forms, Javascript, Angular, Python, Oracle WebLogic, PL/SQL, Git, TFS, Azure DevOps, Visual Studio, Maven, SOAP/REST APIs, Swagger, Postman, Adobe LiveCycle/AEM Forms, MuleSoft Anypoint, Jenkins, Jira.

- **Celfocus**

Lisbon, Portugal

Internship

Jan' 2019 - Sep' 2019

- **Description:** Developed my Master's thesis at Celfocus (Novabase/Vodafone Portugal joint venture) in the Telecom Revenue Management department.
- **Skills:** Worked with Big Data and Analytics tools such as Apache Kafka, Flink and Cassandra. Also developed skills in Java, Python, PL/SQL, Git, Maven, project documentation, organization and clean code practices.

- **NOVA School of Science and Technology**

Almada, Portugal

Internship

Nov' 2016 - Mar' 2017

- **Description:** Worked in the eLearning lab, explored open source projects and platforms, researched state of the art solutions and developed a mobile VR demo for Android showcasing a 3D model of the campus library.
- **Skills:** Worked with the Unity engine, SketchUp, and developed research and documentation skills and methodologies.

EDUCATION

- **NOVA School of Science and Technology**
